- Terrain Information
 - > Overview

The terrain is located in the north-eastern part of Takahara Mountain at altitude $950 \sim 1,450$ m.

It consists of a ski resort Hunter Mountain Shiobara and the surrounding forests.

Landform

The terrain is shaped by large ridges and valleys as well as a few complex features. The south-east side of the terrain is higher in altitude and steeper, while the north-west side is lower and flatter. Deep valleys run across the terrain, making it difficult to cross.

Vegetation

Runnability and visibility are fairly high. There are open-lands in parts of the terrain.

- Paths and other notable features While there are forests roads and construction roads throughout the terrain, there are only a few footpaths. The spurs lack features, but deep valleys have many features such as rocks and stony grounds.
- Special notes and cautions Existence of ticks have been confirmed in the terrain. Refer to the preferred attires and items listed in the next section.

Equipment

There are no regulations regarding clothing and shoes.

But the following items or clothing are recommended.

- > Insect Repellant Spray Containing DEET
- > Long Sleeves and Pants (since ticks are found in the terrain)
- > Shoes with Metal Studs (since slopes are slippery)
- > Whistle (to prepare for emergencies)
- > Bear Bell (since bears are found in the terrain)

The use of GPS(GNSS) devices with on-screen displays of maps and distances is prohibited. However, if the screen is taped or otherwise made in such a way that the map or distance display cannot be seen, the device may be carried.
